

## Author Index to Volume 16

### A

Abacıoğlu, N., 527-532, 779-787  
Akkoç, N., 335-342  
Alakavuklar, M. N., 335-342  
Altuğ, S., 527-532  
Ando, T., 171-183  
Annett, R. D., 695-710  
Arai, T., 51-58  
Ashkenazi, I. E., 441-450  
Atkinson, G., 93-107, 343-357, 461-475

### B

Ballard, R. D., 565-580  
Barnabas, R., 751-758  
Beersma, D. G. M., 431-440  
Bender, B. G., 695-710  
Block, G. D., 229-247  
Buguet, A., 477-489  
Burgoon, P. W., 69-78  
Buysse, D. J., 79-91

### C

Calbraith, D., 461-475  
Cardinali, D. P., 451-460  
Carrier, J., 79-91  
Çehreli, C., 335-342  
Chandrasekaran, M. K., 163-170  
Chatani, F., 171-183  
Choi, J. S., 821-829  
Cincotta, A. H., 315-333  
Cincotta, E., 315-333  
Clarisse, R., 491-503  
Cohen, W., 505-518  
Colenda, C. C., 505-518  
Cornélissen, G. (book review), 223  
Crocetti, J. G., 663-682  
Cutrera, R. A., 451-460

### D

Dagan, Y., 213-222  
D'Alonzo, G. E., 663-682  
Douglas, S., 199-212  
Dowse, H. B., 69-78  
Dozier, M. M., 185-197

### E

Edery, I., 377-414, 519-525  
Edwards, B., 461-475  
Eisenstein, M., 213-222  
Engel, P. (in memoriam), 533-534  
Erkert, H. G., 149-161  
Esquifino, A. I., 451-460

### F

Fersini, C., 33-49  
Flemming, R., 461-475  
Folkard, S., 93-107, 343-357  
Fujimura, A., 759-765

### G

Gaworski, C. L., 185-197  
Gerkema, M. P., 745-750  
Globig, S., 305-314  
Görgün, C. Z., 779-787  
Güney, H. Z., 527-532, 779-787  
Gutenbrunner, C. (in memoriam), 533-534

### H

Halberg, F. (book review), 223  
Harding, S. M., 641-662  
Hashizume, K., 759-765  
Haus, E., 539-563, 581-622

Heintzen C., 1-16  
 Herzog, E. D., 229-247  
 Hishikawa, S., 759-765  
 Hodoğlugil, U., 779-787  
 Hofstetter, J. R., 269-279

**J**

## Subject Index to Volume 16

### A

- Activity
  - and circadian pacemaker amplitude, 93-107
  - effect on the waking temperature rhythm, 343-357
  - forced desynchrony of circadian rhythms of, 431-440
- Administration-time differences, in the pharmacokinetics of gentamicin intravenously delivered, 821-829
- Advanced sleep phase syndrome, 213-222
- Aging
  - and alteration of the properties of the circadian pacemaker controlling the locomotor activity rhythm, 751-758
  - and differences in sleep, 79-91
- Allergen, circadian variation in asthma, 631-639
- Alzheimer patients, and bright light therapy, 505-518
- Ambient temperature, effect on the circadian activity rhythm in common marmosets, 149-161
- Analgesia, circadian phase dependent, 767-777
- Anticholinergic medications, circadian rhythms in the pharmacokinetics and clinical effects of, 663-682
- Antinociceptive reaction, circadian phase dependent, 767-777
- Arabidopsis thaliana*, circadian system of, 1-16
- Asthma
  - biological rhythms in, 581-622
  - chronopharmacology and chronotherapeutics of, 539-563
  - circadian variation in allergen and nonspecific responsiveness in, 631-639
  - location of airway inflammation in, 623-630
  - See also Nocturnal asthma

### B

- Bile secretion circadian rhythm, dependence of survival while undergoing continuous bile drainage on, 759-765
- Biochemical variables, effect of nocturnal exposure to magnetic fields on, 789-810
- Biological clocks (book review), 110-111
- Biological rhythms
  - in effect of verapamil on rat aorta, 779-787
  - of human core temperature, 69-78
  - in the immune system, 581-622
- Blood pressure pattern, inverse circadian, 293-303
- Brain, time perception and temporal processing levels of, 17-32
- Bright lights
  - effect of daytime exposure on circadian rhythms of urinary melatonin and salivary immunoglobulin A, 359-371
  - therapy, for Alzheimer patients, 505-518
- Bronchial hyperreactivity, in asthma, 623-630
- Bronchial responsiveness, circadian variation in asthma, 631-639
- Bunting, involvement of threshold photoperiod in control of reproductive rhythmicity in, 59-67

### C

- Cardiorespiratory system short-term rhythms, significance in neonatology, 249-268
- Cardiovascular events, circadian epidemiology of, 33-49
- Cardiovascular rhythms, of blood pressure, 293-303
- Catecholamines, urinary excretion of, 305-314

- Cellular immune response, biological rhythms in, 581-622
- cGMP, urinary excretion of, 305-314
- Chronobiology and chronomedicine (book review), 223
- Chronopharmacology  
for asthma, 539-563  
of verapamil, 779-787
- Chronotherapeutics, for asthma, 539-563
- Circadian activity rhythm, in common marmosets, effect of ambient temperature on, 149-161
- Circadian clocks, role of posttranscriptional regulation in, 377-414
- Circadian epidemiology, of cardiovascular events, 33-49
- Circadian oscillation, of mRNA and protein, 115-128
- Circadian pacemaker  
amplitude, and lifestyle feedback, 93-107  
controlling locomotor activity rhythm, alteration of properties through aging, 751-758
- Circadian rhythm sleep disorders, definition and diagnosis of, 213-222
- Circadian rhythms  
in allergen and nonspecific bronchial responsiveness in asthma, 631-639  
of bile secretion, maintaining for survival under continuous bile drainage, 759-765  
of body temperature and activity, forced desynchrony of, 431-440  
food entrained locomotor, 281-291  
in hypotensive effect of sodium nitroprusside and relevance to sympathetic nervous activity, 171-183  
in lung function, relationship to location of airway inflammation in asthma, 623-630  
in the pharmacokinetics and clinical effects of theophylline and anticholinergic medications in the treatment of nocturnal asthma, 663-682  
and sleeping sickness, 477-489  
of sleep-wake and food-intake behavior during early infancy, 129-148  
of urinary melatonin and salivary immunoglobulin A, daytime bright light exposure effect on, 359-371  
of wheel running, 269-279
- Circadian timing system, and age differences in sleep, 79-91
- Circhoral ultradian rhythm, of human core temperature, 69-78
- Corn oil, immunomodulatory screening test of, 185-197
- Corticosteroids  
chronobiology and chronotherapy in the treatment of nocturnal asthma, 683-693  
timed administration and immune reactivity, 315-333
- D**
- Day of week, effects on mnemonic performance, 491-503
- Day-night temporal variation, in serum nitrite levels, 527-532
- Daytime performance, and nocturnal asthma, 695-710
- Desynchrony, forced, 431-440
- Dose-delivery time, effect on immunomodulation of corn oil, 185-197
- Drosophila*  
bearing a conditional allele of the heat shock transcription factor gene, heat-induced degradation of PER and TIM in, 519-525  
timekeeping, role of posttranscriptional regulation in, 377-414
- E**
- Endothelium, influence on biological-time-dependent differences in verapamil effect on rat aorta, 779-787
- Enkephalin analogue dalargin, and circadian phase-dependent antinociceptive reaction, 767-777
- Entrainment, 415-429
- Esterase A4, time-interval activation by removal of PIN fraction, 51-58
- Estradiol, effect of threshold photoperiod on, 59-67
- F**
- Flow cytometry, of circadian changes in platelet activation, 335-342

- Food-entrained feeding, under different light conditions, 281-291
- Food-intake behavior ultradian and circadian rhythms, during early infancy, 129-148
- Free-running rhythm, of wheel running, 269-279

## G

- Gastroesophageal reflux, nocturnal, role in nocturnal asthma, 641-662
- Gentamicin, administration-time differences in pharmacokinetics of intravenous delivery of, 821-829
- Glycine-rich RNA-binding protein, of *Arabidopsis thaliana*, 1-16
- Gonadotrophins, seasonally dependent effect of ectopic pituitary grafts on 24-hour rhythms of, 451-460

## H

- Heat-induced degradation, of PER and TIM in *Drosophila* bearing a conditional allele of the heat shock transcription factor gene, 519-525
- Helicobacter pylori*, seasonal periodicity in the prevalence of, 811-819

## I

- Immune reactivity, and timed daily administration of prolactin and corticosteroid, 315-333
- Immune system, biological rhythms in, 581-622
- Immunoglobulin A, salivary, effect of day-time bright light exposure on circadian rhythms of, 359-371
- Immunomodulatory screening, of corn oil, 185-197
- Infancy, ultradian and circadian rhythms of sleep-wake and food-intake behavior during, 129-148
- Infradian rhythms, and luteinizing hormone release patterns, 441-450
- Interval timer, activation for esterase A4 by removal of PIN fraction, 51-58

## L

- Latitude, and changes in the amplitude of annual mortality rhythm, 199-212
- Leukotrienes, chronobiology and chronotherapy in the treatment of nocturnal asthma, 683-693
- Lifestyle, and circadian pacemaker amplitude, 93-107
- Light-harvesting complex protein genes, circadian expression in plants, 115-128
- Locomotor activity  
and masking, 415-429  
provisional quantitative trait loci for circadian period of, 269-279  
rhythm, aging alters circadian pacemaker control of, 751-758
- Locomotor behavior, and organotypic suprachiasmatic nuclei cultures, 745-750
- Locomotor circadian rhythms, food entrained, 281-291
- Luteinizing hormone release patterns, and ultradian and infradian rhythms, 441-450

## M

- Magnetic fields, effect of nocturnal exposure on human circadian system, 789-810
- Marmosets, common, effect of ambient temperature on the circadian activity rhythm in, 149-161
- Masking  
history, definitions, and measurement of, 415-429  
of temperature data, purification of, 461-475
- Melatonin  
and accelerated reentrainment to phase-shifted light-dark cycles in the field mouse, 163-170  
as a pacemaker, 229-247  
urinary, daytime bright light exposure effect on circadian rhythms of, 359-371
- Mnemonic performance, time-of-day and day-of-week effects on, 491-503
- Monoclonal antibody, anti-GMP-140, for flow cytometric analysis of circadian changes in platelet activation, 335-342

Mortality rhythm, latitude-related changes in the amplitude of, 199-212

## N

Negative-feedback loop, of *Arabidopsis thaliana*, 1-16

Neonatology, significance of short-term rhythms of the cardiorespiratory system in, 249-268

Neuropsychological outcomes, of nocturnal asthma, 695-710

News and comments, 109-114, 225-228, 359-371, 533-537

Nitric oxide, urinary excretion of, 305-314

Nitrite, day-night temporal variation in serum levels of, 527-532

Nocturnal asthma

chronobiology and chronotherapy of corticosteroids and leukotrienes in the treatment of, 683-693

circadian rhythms in the pharmacokinetics and clinical effects of theophylline and anticholinergic medications in the treatment of, 663-682

neuropsychological outcomes of, 695-710

role of nocturnal gastroesophageal reflux in, 641-662

and sleep and respiratory physiology, 565-580

Nonparametric methods, for improved sensitivity of rest-activity rhythms to bright light therapy in Alzheimer patients, 505-518

## P

Peptidyl-inhibitory needle (PIN) removal, for time-interval activation of esterase A4, 51-58

PER, heat-induced degradation of, 519-525

Pharmacokinetics, of intravenous gentamicin, administration-time differences in, 821-829

Phase shift, of light-dark cycles in the field mouse, accelerated reentrainment by melatonin administration, 163-170

Phase-response curves, 711-743

Photoreceptor, circadian pacemakers in, 229-247

PIN. *See* Peptidyl-inhibitory needle

Pituitary graft, ectopic, seasonal dependence of, 451-460

Plants, circadian expression of the light-harvesting complex protein genes in, 115-128

Platelet activation, flow cytometry of circadian changes in, 335-342

Polysomnography, and sleeping sickness as a circadian disorder, 477-489

Posttranscriptional regulation, role in circadian clocks, 377-414

Prevalence, of *Helicobacter pylori*, seasonal periodicity of, 811-819

Prolactin

seasonally dependent effect of ectopic pituitary grafts on 24-hour rhythms of, 451-460

timed administration and immune reactivity, 315-333

Purification, of masked temperature data, 461-475

## Q

Quantitative trait loci, for circadian period of wheel running, 269-279

## R

Reentrainment, to phase-shifted light-dark cycles in the field mouse, acceleration by melatonin administration, 163-170

Reproductive rhythmicity, in bunting, involvement of threshold photoperiod in control of, 59-67

Respiratory physiology, and sleep and nocturnal asthma, 565-580

Retinal clocks, 229-247

Risk concept, 33-49

## S

Seasonal periodicity, in the prevalence of *Helicobacter pylori*, 811-819

Seasons, dependence of ectopic pituitary graft on, 451-460

Serotonergic hypothesis, of sleeping sickness, 477-489

Short-term rhythms, of the cardiorespiratory system, significance in neonatology, 249-268

Sleep

age differences in, 79-91  
circadian rhythm disorders of, 213-222  
and respiratory physiology and nocturnal asthma, 565-580

Sleeping sickness, as a circadian disorder, 477-489

Sleep-wake behavior ultradian and circadian rhythms, during early infancy, 129-148

Sodium nitroprusside, circadian rhythm in hypotensive effect of, 171-183

Suprachiasmatic nucleus, 229-247, 431-440  
organotypic nuclei cultures, and locomotor behavior, 745-750

Survival, dependence on bile secretion circadian rhythm, 759-765

Sympathetic nervous activity, relevance of circadian rhythm in hypotensive effect of sodium nitroprusside to, 171-183

T

Telemetry, 431-440

Temperature

forced desynchrony of the circadian rhythms of, 431-440  
and masking, 415-429  
purification of masked data on, 461-475  
waking, the effect of activity on the rhythm of, 343-357

Temporal processing levels, of the brain, 17-32

Theophylline, circadian rhythms in the pharmacokinetics and clinical effects of, 663-682

Thermoregulation, of human core temperature by circadian ultradian rhythm, 69-78

Threshold photoperiod, involvement in control of reproductive rhythmicity in bunting, 59-67

TIM, heat-induced degradation of, 519-525

Time of day, effects on mnemonic performance, 491-503

Time perception, of the brain, 17-32

Tumor immunology, and timed drug administration, 315-333

U

Ultradian rhythms

circadian, of human core temperature, 69-78

and luteinizing hormone release patterns, 441-450

of sleep-wake and food-intake behavior during early infancy, 129-148

Urinary excretion, of nitric oxide, cGMP, and catecholamines, 305-314

V

Vasopressin cells, 745-750

Verapamil, biological-time-dependent differences in effect on rat aorta and influence of endothelium, 779-787

W

Waking temperature rhythm, the effect of activity on, 343-357
